

# KDC Filtration

268/760 utilizes high flow ports for efficient media backwashing

Activated Carbon Anthracite Coal  
Absorbs organic compounds which produce taste, odor, color and toxicity; and reduces free chlorine.

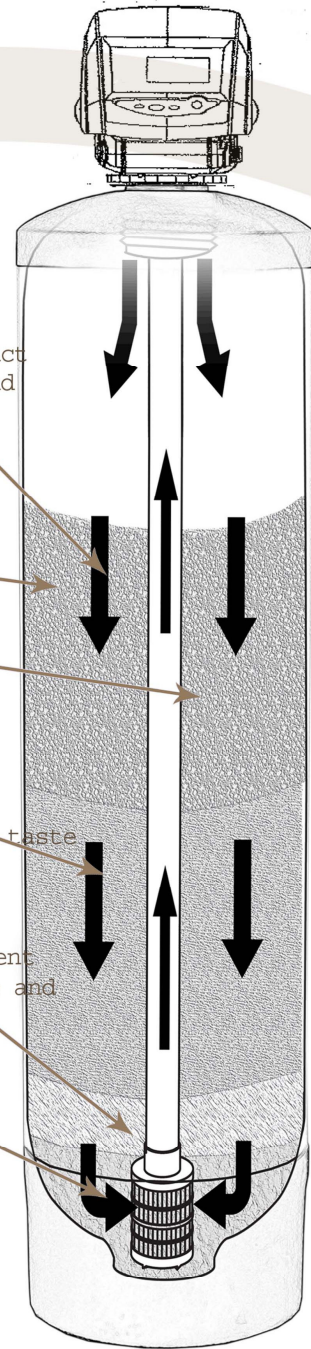

NSF Approved Pressure Vessel; One-piece inner shell with fiberglass outer winding for strength

Distribution designed for high flow and durability

Coconut Shell Carbon  
Same as above and also improves water's taste

KDF Media  
Produces a bacterial static environment and reduces suspended solids, chlorine and hydrogen sulfide.

Quartz underbedding to increase flow

## The alternative to a Water Softener

Multi-Stage  
Whole House Filtration

This system does not soften water.
